

The Definitive Web3 Address for Medical & Healthcare

As the global economy shifts toward RWA (Real World Asset) tokenization, the bridge between real-world services, verified credentials, and the blockchain requires a singular, authoritative address. .com was for information; w3.med is for verification and settlement.

Category thesis

Verified healthcare identity, compliant access, and settlement-native rails.

High-value use cases

- Verified provider registry
- Tokenized access rails
- Consent & audit ledger
- Supply provenance
- Settlement billing
- Healthcare marketplace

Ideal acquirer profile

- Healthcare groups modernizing identity, access, and trust rails
- Health insurers and claims platforms reducing fraud and improving verification
- MedTech platforms building compliance-first onboarding and credential rails
- RWA / identity issuers seeking medical-grade infrastructure
